Wynyard to Burnie Feature Race Runner's Statistics

Competitors about to start the 2009 race in Goldie St. Wynyard

**All Finishers
1968 - 2016**

The Feature Race 1968-2016

The Feature Race was the first PCCCT blue ribbon event and has been held every year since its inception in 1968. The course starts from the main street of Wynyard & finishes with a lap of West Park Oval, Burnie. The length of the course was originally 11 miles. This converts to 17.6 km.

Despite the rise in prestige of several club races, the Wynyard to Burnie 17.6 km event remains the pinnacle of professional distance running on the Coast. While the race has always started in Wynyard's Goldie Street it has finished in different places, including outside the Burnie Surf Club.

Since 1968 the race has attracted some of the best runners in the State including Mike McKenna, Viv Woodward, Leigh Taylor, Trevor Keating, Russell Foley and Dean Giblin. Russel Foley & Dean Giblin came very close to snatching the course record in 1987. Mike McKenna is the only runner to have won the race three times and holds the race record of 53:26 in 1974.

Ron Nielson was the first winner to collect the sash and trophy after crossing the line in 1968. Public support has increased over the years with many onlookers lining the highway at key vantage points to view family and friends competing as well as following the elite athletes.

The finish and now running the course all the way on the left side of the road are the only significant changes in the race's history when those first runners crossed the line in front of the Burnie Surf Lifesaving Club in North Terrace. Current winners break the tape after a lap of the West Park Oval.

Devonport's Anne Ketelaar became the first female runner to complete the distance in 1981 at the age of 42. Penguin's Lyn Saint-John became the first female runner to win the race in 2010. In doing so, Lyn broke the 19-year-old women's record when she ran the course in 65:41 at the age of 41 to better Patricia Thorpe's 1991 time of 66:00 at the age of 32.

I've been a member of the club since 1986 and have witnessed quite a few victory speeches. Some winners give candid admissions about the tactics they used and sometimes waiting for several years, for a mark that put them in with a chance of winning the ultimate prize.

Some runners will try every trick in the book to win. There are several terms used when trying to outwit the handicapper, foxing, and running with the handbrake on. One winner I spoke to called it professional running. These practices make it more difficult for the handicapper to handicap the race fairly.

These statistics are only possible because Barry Ling had the foresight to save every race sheet. Before the race results were put online every race had to be typed into the Superbase app, which first ran on my old Atari ST.

When I joined the club in 1986 all the results were done by pen & paper & put on display the following week. I could see the benefits of using my database to collect this information & produce the results sheets that we now take for granted. I wanted the printouts to include age, km. rate, lost bys & starts which weren't on the hand written results sheet but which is very easy to programme into the database. I would like to have had everyone's date of birth but this information wasn't included on the early result sheets prior to 1986. I still have 107 runners out of 865 who have finished the Feature Race I don't know the ages of. Having all the Feature Races on the computer makes it possible to now produce these stats. The PC version of Superbase 3.2. I now use is no longer supported. It runs on an old computer using Windows XP. All data generated is transferred into Excel & then transferred into Microsoft Word. It's time consuming but there is no other way to do it.

All statistics refer to the Feature Race only and that includes starts.

The next few pages list 865 runners, 722 men & 143 women who have **finished** the Feature Race between 1968 and 2016.

These pages show PBs from fastest to slowest. I have tried to cram as much information as possible on one line.

These statistics are in three sections. The first section shows the 'Best Time' with the 'Age', 'Position' and 'Year'. The second section shows 'Best Place' with 'Time' and 'Year'. The third section shows the 'Year' of the first & last race completed. 'STs' shows the number of Feature Race starts.

It's easier to find your name on this list if know your best time for this race.

Mike Mckenna has been 1st on 3 occasions; this table would need 3 separate lines to show this. The best time doesn't always go with the best place & vice versa.

Women are numbered separately, with Lyn Saint-John the woman with fastest time of 1:05:41 being No 1 in the female column, and overall fastest runner No 199.

In Microsoft Word this table can be sorted in First Name order. Click on the the small box in the top left hand corner of the table, click Table Tools at the top of the page, select Layout & then on the right select Sort & then sort on column 3.

Fem		Age	Pos	Best Time		Best Pos		Year First	Year
